

SC90 PLATFORM [SETUP INSTRUCTIONS]

SC90 PLATFORM | SUPPORT ATTACHMENT:

1. Ensure **Eye Bolts** are sufficiently turned out to avoid interference, prior to inserting supports to **Corner Pockets**. Firmly hand-tighten **Eye Bolts**.
2. Referencing *Master Plan*, place supported platform into desired location. Note orientation of Platforms to ensure male and female **Roto-Locks** are properly located. **Male Roto-Locks** are identified by an **Access Hole** located on the platform surface.
3. Adjust leveling feet as required for leveling surface of Platforms

SC90 PLATFORM CONNECTION:

Note: Platforms are secured together utilizing a male and female **Roto-Lock**. The locks are only functional when partnered.

1. To engage **Roto-Locks**, insert 5/16" **T-Handle** (provided) through **Access Hole** and turn in a *clockwise* direction until snug. Verify all **Roto-Locks** are engaged before use of equipment.
2. To disengage **Roto-Locks**, turn **T-Handle** *counterclockwise*.
3. **CAUTION:** Do not overturn when unlocking, as this will cause a slight reverse engagement.
