

GUARDRAIL [SETUP INSTRUCTIONS]

GUARDRAIL INSTALLATION:

1. Loosen **Set-Screw** on **Guardrail Clip** with 5/16" T-Handle (provided), turning counter-clockwise until **Set-Screw** will no longer turn.
2. Reference *Master Plan* for Guardrail locations. If multiple Guardrail sizes exist, **Label** is located on **Guardrail Clip**.
3. Place Guardrail in **Platform Extrusion** by placing **Lower Flange** in bottom channel of **Platform Extrusion**. Ensure that rail is centered on Platform (left to right). (Note: Guardrails will be 1/2" short of edge of Platform at both sides.)
4. Rotate Guardrail upward as shown in "Guardrail Installation Detail" until **Upper Flange** rests in upper channel of **Platform Extrusion**.
5. Tighten **Set Screws** using 5/16" T-Handle (provided), rotating clockwise until snug.

Guardrail Installation Detail

Guardrail Clamp

GUARDRAIL CLAMP INSTALLATION:

1. Loosen **Thumb Screw** until **Guardrail Clamp** is in (2) pieces.
2. Referencing *Master Plan* for locations, place both pieces of **Guardrail Clamp** near top of rail, clamping **Vertical Legs**.
3. Insert and tighten **Thumb Screw** until snug.
