

ORNAMENTAL RAILING

We've taken safety and style to a whole new level!

In addition to our standard IBC and 2-Line Guardrails, we offer decorative railing styles that serve as a safety function while adding character to any venue or space. Ideal for theatre, production or entertainment applications, the Staging Concepts Ornamental Railing Line can be specifically designed and made to match the look and feel of any project. From classic to modern and sleek guardrail designs, Staging Concept's Ornamental Railing Line includes the following: Invisirail, Gridguard and Tensiline Guardrails.

A variety of finishes, colors and infill materials are available upon request for all Staging Concepts Guardrail products to achieve the desired look for design specific projects.

Gridguard Guardrail

Invisirail Guardrail

Tensiline Guardrail

ORNAMENTAL RAILING

GRIDGUARD GUARDRAIL

The Gridguard series is available in a variety of wire mesh, perforated and other infill materials to achieve an architecturally artistic look. Flexible mounting methods allow for use in nearly any location. The standard Gridguard is made with 1/4" diameter, 2x2 mesh or 1/8" perforated panels with 3/8" diameter holes. Custom mesh and perforated metal is available upon request.

TENSILINE GUARDRAIL

The Tensiline stainless steel cable series is designed and constructed using a 3/16" diameter stainless steel cable and stainless steel fittings. The use of stainless steel cable provides minimal sightline obstruction for a sleek and modern look.

INVISIRAIL GUARDRAIL

The Invisirail series is designed and constructed using acrylic, lexan or glass infill panels. The Invisirail series can be mounted as an independent railing or in combination with many other Staging Concepts' railing options, making it a perfect choice where sightline and safety are a must. The Invisirail's acrylic infill is available in clear, clouded or a variety of colors.

ADVANTAGES

Safety

- Prevents falling and keeps performers and patrons safe
- Guardrail clamps are required to tie guardrail together side by side for extra rigidity and support
- Integral toeboard at bottom of each guardrail

Efficiency

- Attaches to platform extrusion through integral clip assembly with no loose parts
- Tightens and locks to platform with T-handle hex key
- Constructed of lightweight corrosion resistant aluminum –not subject to rust

Variety

- Finishes available: Mill aluminum, powder coat finish (black or silver), or anodized finish (black or clear)
- Custom colors available upon request
